

Assignment Tracker

The point of this webpage is to allow students to keep track of the assignments they have. When adding an assignment it collects information such as Title, Course, Due Date, Status, and Description.

Title	Course	Due Date	Status	Description	Actions
Portfolio	Web and Script	Mon Oct 20 2025	Almost done	Make a digital portfolio about yourself	<div>Edit</div> <div>Delete</div>

It even allows the student to update their assignments along the way so they can keep track of how much work of the assignment they completed, and delete old assignments with a warning if they are sure if that's what they really want to do.

It uses a really simple design with a simple theme making it easy to navigate through the site, with the home page including access to every page in the webpage.
